

AUDITLENS CLINICAL RECORD

AUDITLENS AI SYNTHETIC CLINICAL RECORD
This is fictional data created for a prototype. It contains no real patient information.

Claim ID: CLM-2002
Patient: Priya Shah
Patient ID: PAT-102
Date of Service: 2025-03-04
Provider: Lakeview Primary Care

--- Page 1 ---

Chief Complaint
Priya Shah presents for outpatient evaluation. Symptoms include cough and right upper abdominal discomfort.

Assessment
1. Acute bronchitis, unspecified (J20.9).
2. Cough, unspecified (R05.9).
3. Unspecified abdominal pain (R10.9).

--- Page 2 ---

Orders and Procedures
Chest X-ray, two views, was ordered and completed on 2025-03-04 to evaluate cough, fever, and chest discomfort. Result: no acute infiltrate and no pleural effusion.

One venous blood sample was collected for CBC and comprehensive metabolic panel on 2025-03-04.

Complete abdominal ultrasound was performed on 2025-03-04 after patient concern about abdominal pain. The note documents abdominal pain and concern for biliary disease.

Medical Decision Making
The visit involved low complexity. No CT head was ordered, performed, or discussed.
